Mateus Cechetto

Profile

Software Engineer passionate about simple and impactful solutions.

I've experience with **Python, Groovy, TypeScript, Angular, React,** and **HTML/CSS**.

Work Experience

- **ESSS - Engineering Simulation and Scientific Software** (December 2022 - Present)

  Work as **Full Stack Engineer** on a web application for oil and gas industry. Implement a new module from scratch. My activities:

  - Develop back end using Python, Flask, Celery, SQLAlchemy and Pytest.
  - Develop front end using Angular, Typescript, HTML/SCSS and Jest.
  - Lead web app showcase presentations to stakeholders. (in English)

  `Python` `Flask` `Celery` `SQLAlchemy` `Pytest` `Angular` `Typescript` `HTML/SCSS` `Jest`

- **ZG Soluções** (February 2022 - July 2022)

  Worked as **Back end Developer** on a web application within the healthcare industry. My activities:

  - Maintenance of the system, resolving tickets created by the consumer service
  - Adapt web crawlers to effectively cover a wider range of websites

  `Groovy` `Java` `REST` `Postgresql` `Microservices` `RPA (web crawler)` `Regex` `Git/Gitflow`
- **Lantec UFSC** (September 2018 - May 2020)

  Worked as **Front end Developer** in 2 different projects, both for the Brazil Department of Education (MEC). In both projects my activities were:

  - Develop the front end application with Angular, TypeScript, HTML and SCSS
  - Discuss new features with the Design Team and help to prioritize the items in the Product Backlog

  `Angular` `TypeScript` `API consumption` `HTML/SCSS` `Bootstrap` `Git/GitLab` `Scrum`

Personal Projects

- **Windows XP: Mateus Cechetto Edition** - My portfolio website to showcase some of my projects. The website simulates a Windows XP desktop environment.

  `Angular` `TypeScript` `HTML/SCSS`   `GitHub` `Website`

Education

Universidade Federal de Santa Catarina (UFSC) - Bachelor of Information Systems
